70.1-80	/	L	L	L	L

Function shows

windproof and anti-static

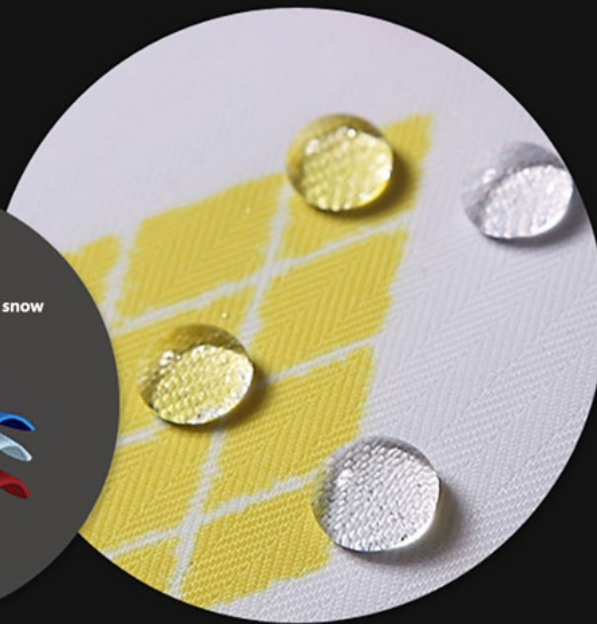

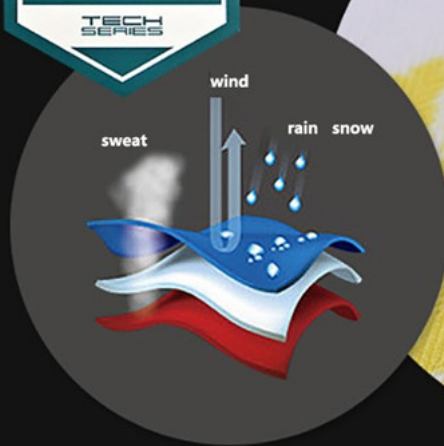

Coating fabrics increased the function of anti-static, principle is forming a conductive layer on the surface of hydrophobic fiber, making the surface of the fiber hydrophilization and ionization, preventing the hidden trouble of electrostatic effectively

MEMBRANE
SWEAT

Fabrics using "dandy" pu coating + the joint technology, can waterproof and can guarantee the air permeability, practice proves that good pu coating is waterproof and breathable, as for the pressure rubber clothes mainly for the stitching of pu yi and the joint damage and water seepage of rubber processing, special pressure seal seams all, further to eliminate leakage of water seepage
